Ahmed Raza

Python Backend Developer

ahmed.raza@example.com · Lahore, Pakistan · github.com/ahmedraza-dev

SUMMARY

Backend developer with 3 years of experience designing and shipping REST APIs in Python. Comfortable owning a service end to end: data modelling, API design, testing, Docker deployment and monitoring.

SKILLS

Python, FastAPI, Django, PostgreSQL, SQL, SQLAlchemy, Git, Docker, Redis, Celery, pytest, Linux, GitHub Actions, AWS

EXPERIENCE

• Software Engineer, CloudNova Solutions (2022 - present, 2 years): built 6 FastAPI microservices for an e-commerce platform serving 40k daily users; cut p95 latency from 900ms to 180ms with query optimisation and Redis caching; introduced pytest suites raising coverage to 85%.

• Junior Developer, Softech Lahore (2021 - 2022, 1 year): Django REST APIs, PostgreSQL schema design and migrations, Dockerised legacy services.

PROJECTS

• Clinic appointment API (FastAPI, PostgreSQL, Docker) with JWT auth and role-based access.

• Open-source contributor to a SQLAlchemy utilities library (merged 5 PRs).

EDUCATION

Bachelor of Science in Computer Science (BSCS), Lahore Garrison University, 2021. CGPA 3.6

CERTIFICATIONS

AWS Certified Cloud Practitioner (2023)
